

FORscene launches at IBC2004

FORscene from Forbidden Technologies is an **unrivalled video editing and publishing tool**. It gives you frame accurate editing with EDL output for auto-conform to broadcast quality, as well as built-in publishing options for web and mobile.

FORscene works without **any** software installation or hardware upgrades.

FORscene enables you to edit collaboratively over the web with anyone, anywhere in the world. You are not tied to a particular machine.

FORscene has a remarkable feature set:

- ❏ Intuitive in use
- ❏ Responsive
- ❏ Accessible anywhere
- ❏ Advanced navigation
- ❏ Reliable
- ❏ Video library
- ❏ Collaborative editing capability
- ❏ Web/mobile phone publishing
- ❏ EDL export
- ❏ Pay as you go
- ❏ User-centric updates

To try out FORscene **for free** go to: wwwb.forbidden.co.uk/~forscene/guest/

FORscene – a state-of-the-art post production tool for video.
